PALLET LIFT FORK

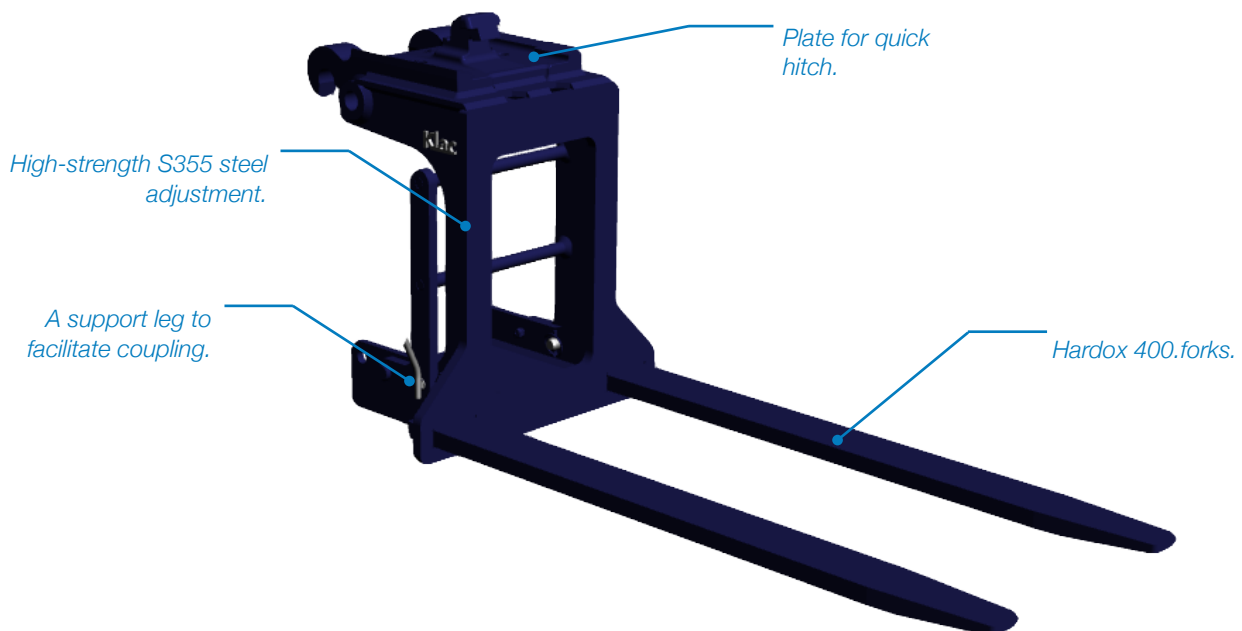

- Compact, innovative, modern concept
- Rugged and durable

A TOUCH OF MODERNITY

In fixed versions, the Klac pallet fork has an ingenious design for better visibility and handling.

The forged and tempered forks guarantee strength and longevity.

TECHNICAL FEATURES

FOCUS ON
The fixe version

Product also designed to be used with the rotating coupler: holds the load in a horizontal position.

Equipped with a detachable support to facilitate coupling and uncoupling.

SAFETY QUESTION

Reinforced forks made from Hardox 400. Withstands the heaviest loads and ensures maximum durability.

 A coupling support that makes it easier to connect the coupler to the pallet lifter, reducing the risk of errors and ensuring safer handling.

Wide deck and rear counterweight ensure optimal load stability, prevent the pallet lifter from tipping over during attachment and significantly reduce the risk of the attachment falling.
