## SOLO

- Capacity 2, 5 times superior than a traditional bucket of the same width
- An economic and environmentally friendly solution
- Blades profile designed to give a clean cut with minimal damage at ground level
- No bucket side plates making easy the bucket discharge (clay blade)
- Very easy change of blades

- Hinged bottom facilitating ejection of earth (can be blocked if necessary)
- Silent thanks to the shock absorbers
- Reduced widths possibilities, from 210 mm
- Notched profile adapted to release pipes

- Narrow trenching, without soil clogging
- Very easy change of tools
- Saving of fuel and materials
- High-yield elasticity steel parts and anti-abrasive blades, for more strength
- Discharge height improved
- The most sticky clays are easily removed

## THE COUNTRYSIDE BUCKET

The principle of blades superposition (3 blades sand or clay) allows to increase the charging capacity although very narrow widths (inaccessible to existing buckets, due to soil clogging problems). The cost reduction realized by a narrow trenching offers a quick return on investment.

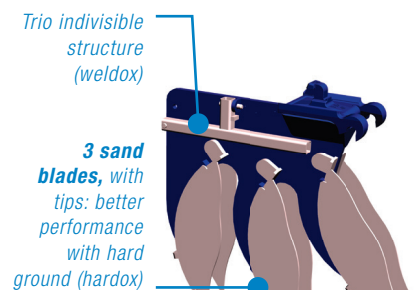

## THE TOWN BUCKET

Klac city is the ideal complement of the Klac marguerite. The specificity of urban works is the presence of cables and pipes, not always easy to locate. The solution is the Klac city, an attachment that allows narrow trenching while providing a clever solution to the clogging problems! All this with an interesting capacity and an utilisation that does not endanger the existing pipes.

## THE POLYVALENCE

Mini excavators have done a lot on job sites over the last 20 years to mechanize tasks and make them easier for the operators. The ideal would be to make your balance boom as agile as a hand! To grab a shovel, a rake, a spade, a sweeper... This is exactly what Klac marguerite offers you, a real tool holder!

### TECHNICAL FEATURES

Less fuel consumption, less transport for the materials to evacuate and retreat, less cost for substitute materials, so many reasons to be **environmentally friendly!**

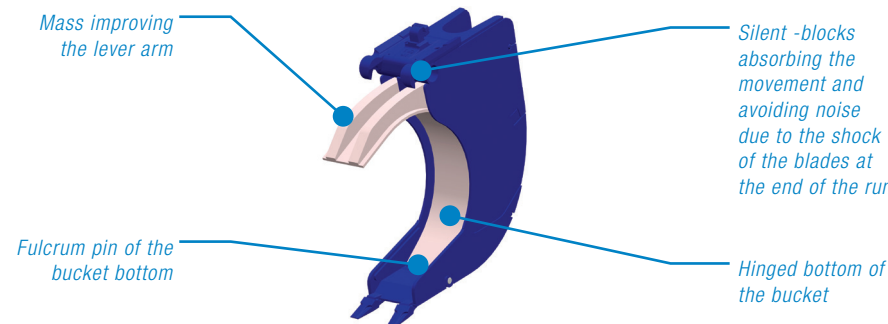

When the width of the trenching is less than the width of a truck tire the risk of soil deformation is considerably reduced.

Compatible with all Klac range of hitches.

#### Klac marguerite TRIO RANGE

Depending on configuration		Available in version	Width (mm)		With tips
Depth	Weight max		min	max	
Model E / 2 (mxs of 4 to 6 t)	255 kg	sand blade	150	300	yes
		clay blade	150	450	no
Model F / 3 (mxs of 6 to 9 t)	370 kg	sand blade	150	350	yes
		clay blade	150	500	no

### TECHNICAL FEATURES

#### Klac city RANGE

Width (mm)	Depth* (mm)	Weight (kg)
Model E / 2 (mxs of 3,5 to 5,5 t)	900	200 to 260
Modèle F / 3 (mxs of 5,5 to 9 t)	1100	276 to 332

\*Depth limited to 900mm for 250mm width and less - Depth limited to 1100mm 300mm width and less

### TECHNICAL FEATURES

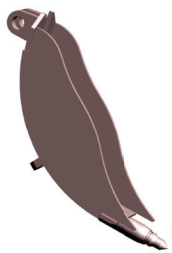

FR UK IT SP

# Klac marguerite

SOLO

## FOCUS ON The blades

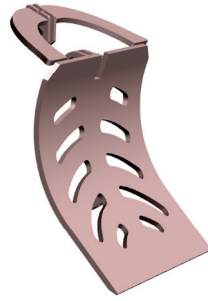

### Sand blade

Working effectively in free flowing sandy soils, with tips for better digging.

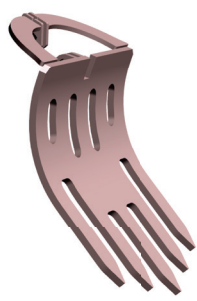

### Clay blade

Perfect to work in sticky soils, easily discharged: output improved.

### Excavation blade

Designed to increase productivity and also for precision work.

### Spade blade

Pull up small trees without damaging the roots.

## Others accessories

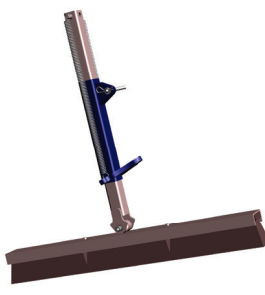

### Klac cut

Cut around trees and stumps before lifting. The teeth allow to saw the main roots, without excavation.

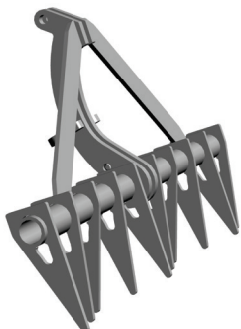

### Klac ripper

Permit to realize demolition works adapted to the size of your machine.

### Klac sweeper

Finish the access to works. 2 springs insure the necessary working pressure.

### Klac rake

Finish the job site and gardens. Exclusive system against soil clogging.

## Klac marguerite SOLO RANGE

# Klac marguerite

DUO

2  
GUARANTEE

PATENTED

- Loading capacity approximately the double of a traditional bucket of the same width
- Saving of fuel and materials
- Uses the bucket cylinder (more efficient than the balance boom cylinder)
- Blades profile designed to give a clean cut with minimal damage at ground level
- No bucket side plates making easy the bucket discharge (clay blade)
- Very easy change of blades

## THE PERFORMANCE

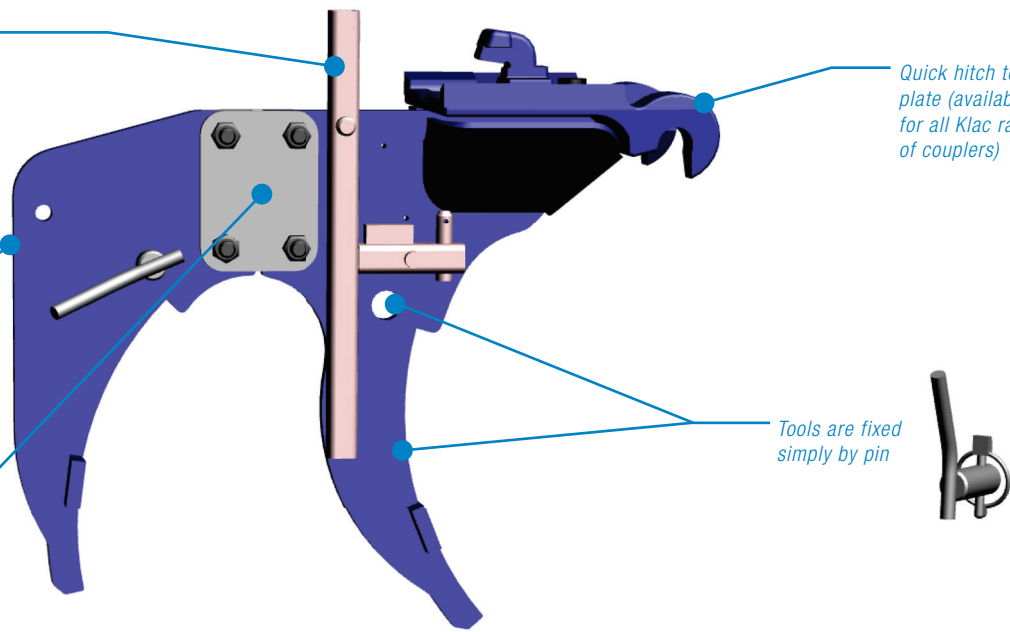

Carry out trenching of 100 or 200 mm with a bucket, is not a problem anymore! Thanks to the Klac marguerite DUO version, it is now possible to dig narrow trenching without earth clogging, increasing your productivity at the same time.

## TECHNICAL FEATURES

Support to sustain Klac marguerite during the tool change

Rear frame made of high yield elasticity steel

Bolted connexion plates (high flexibility and strength)

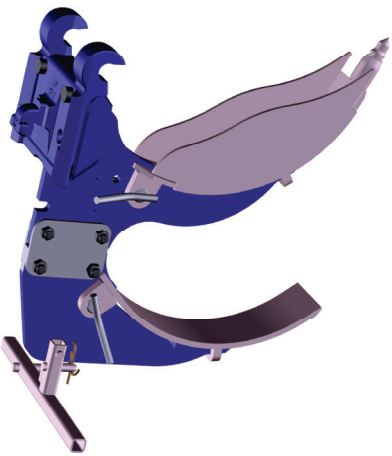

Quick hitch top plate (available for all Klac range of couplers)

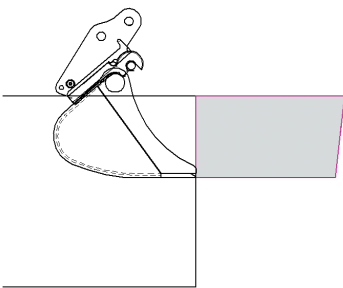

Tools are fixed simply by pin

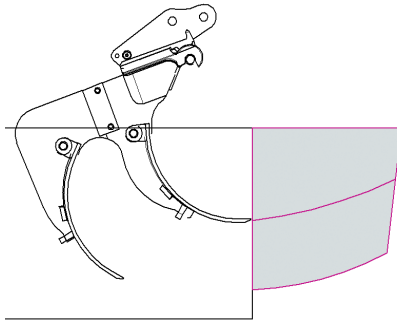

## Sand blade & clay blade

## QUICK AND SIMPLE TRANSFORMATION INTO Klac marguerite SOLO

Standard bucket

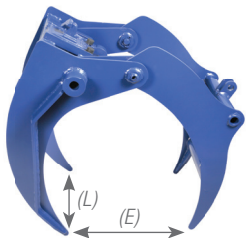

Double productivity

## FOCUS ON Klac manip

**Klac manip**, the solution for all your handling (plants, logs, pole, pipes...). This attachment is convenient and easy to install. It works with the bucket cylinder. **No hydraulic connection**, so no risk of tearing away the hose while working with branches.

(Not suitable for rockfill).

**Klac manip** is available for 1t to 9t machines (4 models).

Opening of jaws (E) : from 800 to 1600 mm\*  
Width (L) : from 500 to 950 mm\*

\*according to the model
