Klac manip

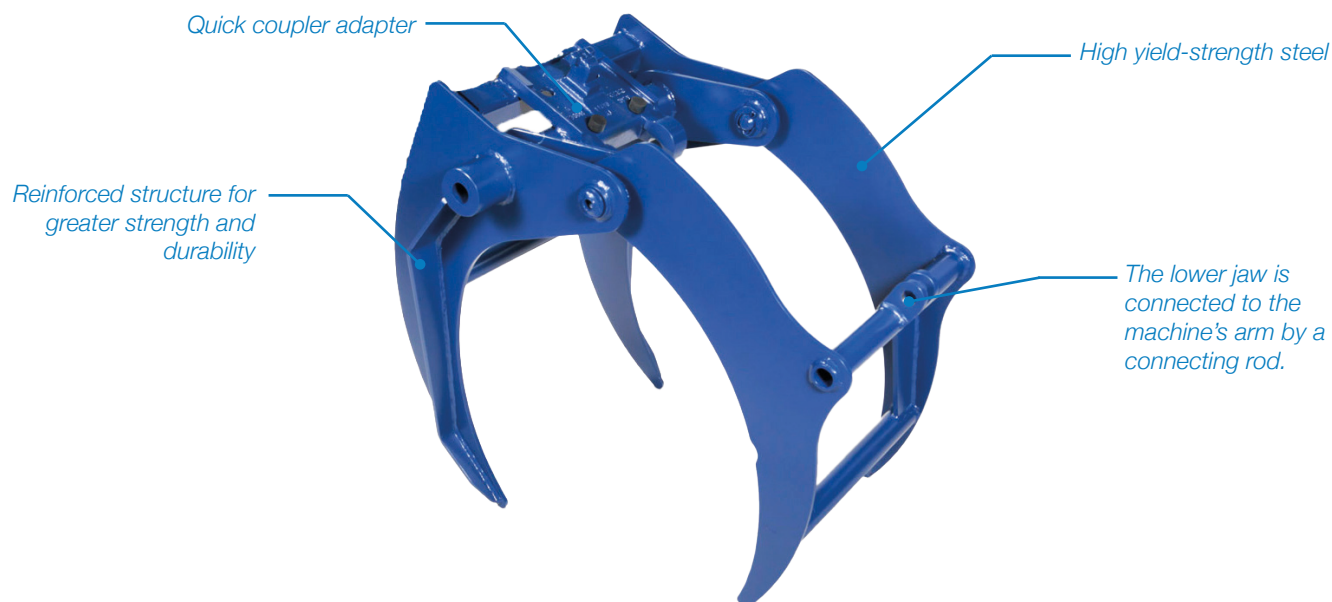

- Practical and easy to install
- Works with the tilt bucket cylinder
- No hydraulic connections

**DON'T LOSE A
MINUTE !**

Klac Manip, the solution for all your cut branches, tree trunks, stones, rocks and garbage. It can also be used to load these different materials into a truck. It's an essential accessory for landscapers, nurserymen, local authorities, renting companies, etc.

TECHNICAL FEATURES

FOCUS ON How it works

Hydraulic clamps already exist. But the Klac **manip** stands out in the fact that it does not require any other additional hydraulics devices and can be hooked up like a bucket with the **Klac system**.

The lower jaw is connected to the machine's arm by a connecting rod. The upper jaw, activated by the cylinder, closes on the body to be moved.

The lower jaw is positioned.

All that remains is to close the upper jaw to «pinch» the body.

The upper jaw, activated by the cylinder closes, blocking by this way the two bodies .

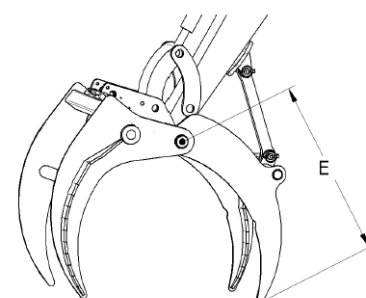

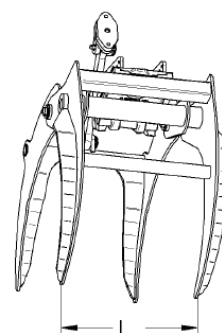

AVAILABLE WITH

KLAC SYSTEM

ALTERNATIK

THE RANGE KLAC MANIP

Model C / 0
(0,8 - 2t)

Model D / 1
(2 - 3,5t)

Model E / 2
(4 - 5,5t)

Model F / 3
(5,5 - 8t)

| Ref | Weight kg | E mm | L mm |
|----------|--------------|---------|---------|
| MAN500CB | 65 | 800 | 500 |
| MAN500DB | 91 | 1 000 | 550 |
