HANDLING GRAPPLE

- Hardened and tempered axis and bushings for a better durability
- Hoses are spiral wounded to protect the rubber
- All models (even the smallest) have standard pistons
- The claws are entirely made of Hardox (tips and fins)

THE STEEL HAND

This equipment is designed and built for the **collection** and the **handling** of bulk materials such as scrap **metal**, **urban waste**, industrial waste, plastics, etc.

TECHNICAL FEATURES

FOCUS ON Removable rotator

- ✓ The hydraulic rotator is partially built-in the clamp structure to reduce collisions with ferrous materials and increase the reliability.

- ✓ Integrated hydraulic distributor.

SAFETY QUESTION

✂ All models are equipped with a swivel joint which limitate hoses length and the risk of abrasion on the hoses and connections.

The claws are reinforced to avoid deformation of the blades, which guarantees optimal closure at all times.
